

# SPECIFICATION SHEET

Product name: BSP-1D300-110 (WAX/RESIN)

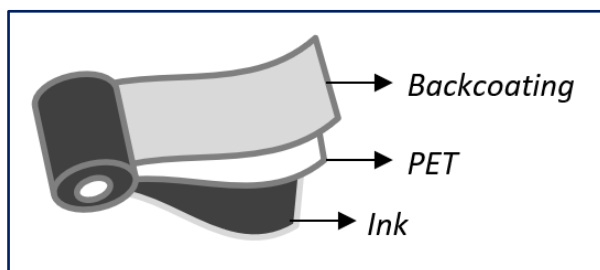

**BSP-1D300-110** is a WAX/RESIN premium thermal transfer ribbon designed for flat head printers. It prints on a wide range of media (couche, matte, tyvek, BOPP...) and is widely used for printing on labels for traceability and control of shipments and stock. This ribbon is designed to work in a wide range of Brother label printers on the market, prolonging the life of the printhead thanks to the "backcoating" sliding layer. It is specially designed for resisting wet and freezing environments.

## Applications

- Labelling in warehouse / shipments
- Traceability labelling
- Pharmaceutical leaflets

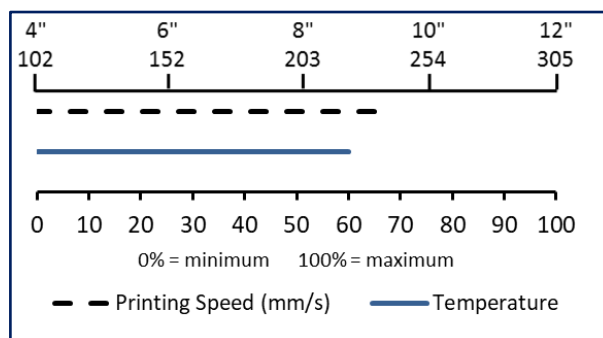

## Supports

- Matte paper
- Couche paper / high gloss
- Polypropylene

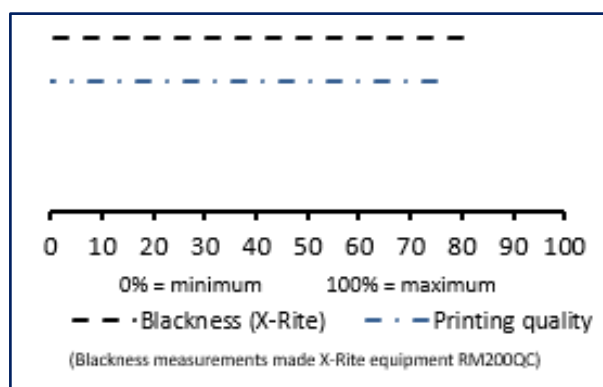

## Backcoating

- It favours the high speed of printing
- Protects the head from both friction and particle adhesion
- Treatment against static electricity

## Ink

- Melting point (DSC): 80°C
- Thickness:  $7.85 \pm 0.12 \mu\text{m}$

# SPECIFICATION SHEET

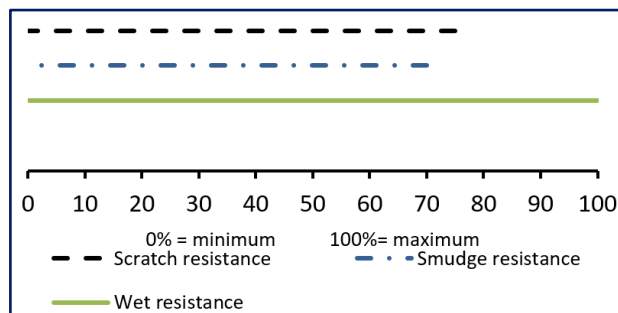

Product name: BSP-1D300-110 (WAX/RESIN)

Certified by  
**Brother  
International  
Europe**

## Resistances (polypropylene, 203 mm/s)

Strength tests performed on Electronic Crockmeter M238BB with M238CT textiles (400 cycles for dry and wet rubbing and 200 cycles for metal rubbing).

## Certifications

- REACH/SVHC: 1907/2006EC  
850/2004
- RoHS: 2011/65/EC

## Colour range

Black

## Storage

- 5 ° C to 35 ° C
- 45% to 85% relative humidity
- Protect the products from sunlight

## Expiration

1 year

**NOTE:** These specifications are only a guide. Due to the large number of surfaces, label finishes, varnishes and applications, Brother International Europe recommends that the printing tests be made for each specific case in your own environment. **Effective May 2019.**
